

Sterilizing baby supplies

Usage

Baby supplies like silicone/rubber nipple, pacifier/Dummy, baby teether

How to use :

1. Pour electrolyzed water into sink, wash basin, bowl etc.
2. The things that you want to sterilize or deodorize should be immersed into this liquid for 6 minutes, rinsed with clean water, and then dried.

Effect :

Sterilizing, deodorizing the surface of stuff.
Removing oily or greasy residue

Caution :

A long time exposure to electrolyzed water will cause discoloring and/or corrosion of the material which's weak to water or moisture, i.e. wood.

*** avoid extreme / excessive soaking of any material in electrolyzed water
