PRESS THE START BUTTON AND WAIT 5 MINUTES .

WHEN THE ELECTROLYZED WATER IS READY POUR TO USE.

OR POUR INTO A SPRAY BOTTLE AND USE.

#### How to use :

1. Put your foods in sink bowl.
2. Pour electrolyzed water to let the foods sink in.
3. Drain the water and rinse the foods by clean tap water to eat or store them.

#### Effect :

Removing the residues of pesticides and sterilizing fruits or vegetables  
Sterilizing food poisoning bacteria on the surface of foods

#### Caution :

1. Long time exposure to electrolyzed water will cause unexpected change of shape or damage.
2. Before cooking, be sure to rinse the foods by tap water after cleaning by electrolyzed water.

# MAKING ELECTROLYZED WATER WITH aHOMEGUARD

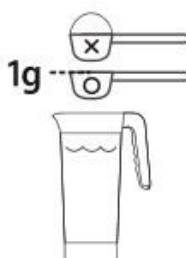

## Pitcher(1000ml)

1

Pour 1L of tap water  
(do not use mineral water)

2

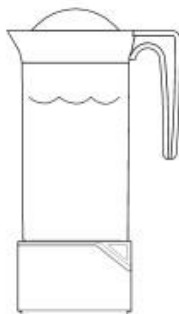

Add 1 spoon of salt (1g)  
if needed as per Recipe  
Book

3

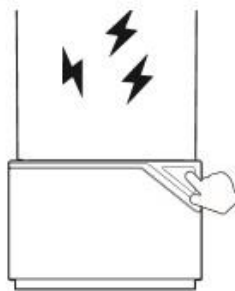

Stir the water with the stirrer

4

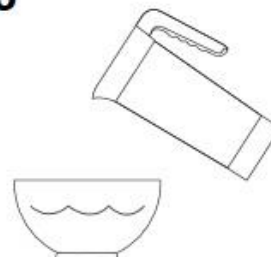

Put the pitcher on the Base  
Station after closing the lid

5

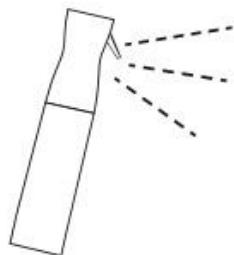

Press the operation button  
and the process will start  
for 5 minutes (you will see  
a blue light and bubbles  
forming)

6

Apply the electrolyzed  
water to a container and  
use where/when you want  
as per the Recipe Book

7

Pour the electrolyzed  
water into a spray  
bottle and use
